1. Click on File -> Make a copy

Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	Car Repair	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
The user will input their car model number.	The program will then take this number and sift through the car model numbers that are defected and see if they are the same. These numbers have to be: Cars with model numbers 119, 179, 189 through 195, 221, and 780	If the car model number is one of the defective, a message will display on the screen indicating that this car model is defected and needs to be repaired. If not, then a message will indicate that the car model is not defected
